

Weekly Log Entry

Major Project: MP-II

Date: 18th February 2025

Week No.: 2

Meeting No.: 2

Prepared By: Kartikey Srivastava (221030321)

Tasks Decided in Previous Meeting

- Implement localization support within the application.
- Organize and ensure maintainable structure for multilingual support.
- Test the application for UI consistency when switching between languages.

Work Completed During the Week (16th February – 22nd February)

- Continued development of the mobile application by integrating the **localization setup across additional screens** of the app.
- Performed **testing of language switching functionality** to ensure that localized strings were properly displayed across different UI components.
- Identified and fixed **UI layout inconsistencies** caused by varying text lengths in different languages.
- Worked on **bug fixes related to authentication flow**, ensuring appropriate user feedback when login actions could not be completed due to configuration issues.
- Addressed **build and dependency issues in the Flutter project**, including resolving warnings related to deprecated packages and ensuring successful project compilation.
- Improved **code structure and maintainability** by refactoring certain UI components and separating configuration files from business logic.
- Tested the application on multiple devices and simulators to ensure **stable performance and consistent UI behavior**.

Learning Outcomes

- Improved understanding of real-world debugging and issue resolution in mobile application development.
- Learned to handle dependency management and build configuration in Flutter projects.
- Developed better skills in testing and optimizing multilingual UI components.

Internal Supervisor: Mr. Ajeet Kumar Verma
