

Weekly Log Entry

Major Project: MP-II

Date: 25th February 2025

Week No.:

Meeting No.: 3

Prepared By: Kartikey Srivastava (221030321)

Tasks Decided in Previous Meeting

- Extend localization implementation across additional screens.
- Resolve UI issues related to multilingual text expansion.
- Continue improving application stability and structure.

Work Completed During the Week (23rd February – 1st March)

- Designed and implemented the **Product Recommendation UI** to display suggested products below the main product details section.
- Developed responsive **UI components and layouts** to present recommended products in an organized and visually appealing format.
- Integrated **data handling logic** to fetch and display related product information dynamically within the application.
- Implemented **scrollable product cards and UI elements** to improve the user experience when browsing recommended items.
- Ensured that the newly developed UI components were **compatible with localization support**, verifying that translated text did not break the layout.
- Conducted testing on different device sizes to ensure **UI responsiveness and proper rendering of product recommendation sections**.
- Performed minor **UI refinements and bug fixes** to improve visual consistency and user interaction.

Learning Outcomes

- Learned to design and implement dynamic UI components for product recommendation systems.
- Improved skills in responsive UI development and layout optimization in Flutter.
- Gained experience integrating data-driven components with user interface elements in a mobile application.

Internal Supervisor: Mr. Ajeet Kumar Verma
