

Major Project: MP-II

Week No.: 5

Prepared By: Kartikey Srivastava (221030321)

Date: 11th March 2026

Meeting No.: 5

Tasks Decided in Previous Meeting

- Enhance recommendation rail UI and fix related bugs.
- Improve product search page layout and usability.
- Fix padding and alignment issues in UI components.

Work Completed During the Week (9th March – 15th March)

Implemented improvements in the product search page UI, including updates to the rail layout for better usability and navigation.

Fixed multiple issues in the recommendation rail UI to ensure proper rendering and alignment of recommended products.

Resolved padding issues in wholesale product images, ensuring proper spacing and consistent display across devices.

Addressed double-row alignment bugs in product listing layouts, improving overall structure and readability.

Enhanced UI responsiveness and ensured consistent behavior across different screen sizes.

Performed testing and validation of UI fixes to ensure stability and smooth user experience.

Learning Outcomes

Improved skills in designing scalable UI layouts for complex components like recommendation rails.

Gained experience in handling spacing, padding, and alignment challenges in Flutter UI development.

Learned how to systematically debug and fix UI-related issues in large components.

Internal Supervisor: Mr. Ajeet Kumar Verma
