

Weekly Log Entry

Major Project: MP–II

Date: 8th February 2025

Week No.: 1

Meeting No.: 1

Prepared By: Kartikey Srivastava (221030321)

Tasks Decided in Previous Meeting

Not applicable (First meeting of MP–II).

Work Completed During the Week (8th February – 15th February)

- Studied the concepts of internationalization (i18n) and localization (l10n) in cross-platform mobile applications.
- Researched Flutter’s localization framework, including locale handling and language resource management.
- Designed and implemented a basic localization structure within the mobile application.
- Created separate language resource files to store text strings independently from UI logic.
- Configured the application to support multiple locales and tested language switching across different screens.
- Verified UI consistency, text alignment, and responsiveness for localized content.

Learning Outcomes

- Gained hands-on experience in cross-platform mobile application development.
- Learned implementation of localization in mobile applications.
- Understood scalable architecture for maintainable app development.

Internal Supervisor: Mr. Ajeet Kumar Verma
